## A specialist service for hazardous waste

Veolia Environmental Services is an international, market-leading waste management company providing a comprehensive range of services for organisations and people across the UK. We anticipate and evaluate new legislation, develop and assess environmental technologies and research our customers' practical requirements to provide successful and sustainable waste management services.

We are part of Veolia Environnement, the world leader in environmental services and the only company to provide a full range of integrated solutions across water, waste management, energy and transportation sectors. Our long-term global experience and thorough local knowledge enable us to work effectively with commercial organisations of all sizes and sectors, whilst caring for the communities and the environment in which we operate.

### Our UK services include:

- Hazardous waste
- Commercial waste
- Recycling and recovery
- Packaging waste & WEEE compliance
- Municipal services
- Industrial site services
- Integrated management services
- Marine waste
- Waste treatment and disposal

A key part of our business service is to anticipate the effects of changing technologies, legislation and provide timely and effective information on how advances will affect you.

The result is a flow of free updates, literature, seminars and on-line services, which offer practical advice and guidance on a complex and rapidly evolving market.

## Chempac: the environmental solution

Ever-increasing amounts of legislation from Europe is pushing us to ever-higher performance in terms of recycling tonnages and technology development. As each new measure is introduced, we're getting better at preparing for its impact and adapting to its requirements. The message is now clear; businesses must remain at the forefront of environmental practice or risk being left behind.

New hazardous waste regulations, implementation of the WEEE Directive and the Batteries Directive, amongst other measures, have introduced a further range of new obligations for businesses. To prevent our customers from having to search out individual services for each waste stream affected, we have collected all our relevant solutions into an efficient package from which you can select the expert services you need.

Chempac is designed to efficiently and cost-effectively fulfil your environmental and legislative obligations as a hazardous waste producer.

## Your waste; our responsibility

Chempac is a set of environmentally sound, specialist collection and packaging services using a trained and technically skilled workforce with the latest disposal and recycling technologies to manage your waste in accordance with current legislation.

- Laboratory chemicals
- Solvents
- Aerosols
- Batteries
- Fluorescent tubes
- Garage waste
- Household hazardous waste
- Oils
- Paints
- Pharmaceutical waste
- Photographic & printing waste
- WEEE

Focusing on simplicity and efficiency, we provide cost effective services for a wide range of relevant industries, including waste classification, packing, provision of suitable containers, labelling and transportation services and safe disposal. From relatively small quantities of hazardous waste from commercial businesses and schools, to civic amenity sites dealing with larger quantities of hazardous household waste, as well as the more specialised long-term requirements of the chemical and pharmaceutical industries, our services are adaptable to your specific needs.

### Fulfilling your obligations

We are committed to helping you ensure that you are equipped to meet legislative requirements and prepared for increasing environmental challenges. With extensive experience of UK legislation and the backing of Veolia Environmental Services' global resources, we are perfectly placed to help you work through the implications of legislation on your business.

- Duty of Care Regulations
- Hazardous Waste Regulations
- Pre-treatment Regulations
- Waste Electronic and Electrical Equipment (WEEE) Directive
- Batteries Directive

### Efficient, reliable network

We maintain a nationwide network of service centres, which operate a full range of specially designed vehicles and provide trained mobile chemists to assist in identification, listing, labelling and packaging. Whether it be a one-off removal of laboratory smalls or a regular collection of drums of hazardous waste, Chempac has the expertise and resources to provide a comprehensive, total care service.

The fleet includes curtain-sided flatbeds for drums and box vans for smaller quantities of packaged chemicals. All our staff are trained to industry ADR standards in moving hazardous items safely and correctly and Chempac ensures the correct storage and disposal option for your waste.

- Listing
- Packaging
- Provision of containers
- Container exchange
- Labelling
- Transportation
- Safe disposal

## The complete Chempac service

### Mobile chemist service

Our Chempac mobile chemist service specialises in the safe, efficient handling and disposal of laboratory and packaged chemical wastes. A team of fully qualified and experienced support chemists is on call from a nationwide network, providing waste identification, listing, labelling, packaging, transportation and disposal services which meet all your legal obligations.

### Packaged chemical collection service

Our broad range of collection vehicles means no collection is too great or small. Chempac can supply the correct packaging and container for you to hold your waste and exchange these containers on a call-off or scheduled basis. We service customers from all industrial sectors including chemical and pharmaceutical production.

### Automotive exchange

Our specialist garage waste exchange services are provided from a network of strategically located service centres. Chempac offers a wide range of waste disposal options and container exchanges for oil filters, antifreeze, waste fuels, batteries and other automotive waste products. Responding to customer requirements, collections can be scheduled or organised promptly by calling your Chempac Services centre. We safely transport hazardous wastes to the optimum location for recycling or treatment and disposal.

### WEEE collection

We operate a simple and effective WEEE collection service for larger hazardous waste items such as PC monitors, fridges and larger fluorescent tubes.

Order your specially designed container units for used fluorescent tubes, computer monitors and base units over the phone or via email, let us know when they are full and we will come and collect.

The service provides full documentation at collection point, operates high security during the transfer and recovery process and achieves high levels of recycling.

### Eco-Box\*

Eco-Box\* provides a safe collection service for small hazardous wastes that cannot be thrown away in your general waste bin. Once you have filled your Eco-Box\* we collect and recycle or re-use the contents, ensuring that all necessary paperwork is completed correctly on your behalf.

- Flammable solvents (e.g. thinners/ white spirit) in small containers
- Empty contaminated containers with residues of oil, paint, solvents, resins, inks adhesive or detergents
- Alkaline batteries
- Full or part-full paint tins – water, solvent or oil based
- Toner cartridges (powder or liquid)
- Printed circuit boards and other electrical equipment
- Light bulbs including small fluorescent tubes (unbroken)
- Aerosols (excluding oxidising or corrosive content)
- Oil and solvent contaminated rags or granules
- Adhesives, resins and inks in small containers
- Antifreeze in small containers
- Soaps and hand cleaners in sealed containers

### Simple, tailored solutions

Simply call or email and we will take it from there. We can tailor a service to your business needs: from one off collections of small hazardous items to a complete on-site service.

As the UK's leading waste management company, we operate a comprehensive network of recycling, treatment and disposal facilities, which are all accredited to ISO 9001, ISO 14001 and OHSAS 18001.

Thanks to extensive research and development we are able to invest in the latest technologies, developing new infrastructure and pioneering recycling and composting solutions, which help to keep your business at the forefront of environmental practice.

We operate a simple and reasonable pricing structure, so you can identify your costs easily. We can offer complete peace of mind: your waste is handled in full compliance with legislation.

Our services are designed to comply with regulations and provide excellent environmental performance, at a rate that won't cost the earth.
