

INDUSTRIAL SITE SERVICES

# sharing responsibility

## safe, professional industrial site services

Veolia Environmental Services is an international, market-leading waste management company providing a comprehensive range of services for organisations and people across the UK. We anticipate and evaluate new legislation, develop and assess environmental technologies and research our customers' practical requirements to provide successful and sustainable waste management services.

Our long-term global experience and thorough local knowledge enable us to work effectively with commercial organisations of all sizes and sectors, while caring for the communities and the environment in which we operate.

- o Specialist industrial services
- o Hazardous waste services
- o Commercial waste services
- o Recycling and recovery services
- o Packaging waste compliance
- o Municipal waste services

### Keeping our customers informed

The UK is in the process of developing how we treat and dispose of our waste. Veolia Environmental Services proactively helps our customers to adjust to these important changes, using a combination of free updates, literature, seminars, road shows, exhibitions and on-line services which offer practical advice and guidance on a complex and rapidly evolving market.

### Tailored industrial solutions

Achieving quality industrial services demands a unique combination of expertise and experience. Veolia Environmental Services works with all major sectors to meet the challenges presented by each project, using a comprehensive range of technologies to provide tailored solutions with minimum disruption to industry processes. We are well known for our problem solving, strategic approach, applying unrivalled technical knowledge, intensive training, and the latest equipment along with proven measurement and control systems, to provide reliable, progressive and cost effective industrial site services.

## professional management systems

We provide bespoke management systems and effective environmental solutions to handle your projects safely, quickly and efficiently. We work across all major sectors, using our in-depth knowledge of industry processes to provide insight into the issues affecting each individual project and to facilitate an effective dialogue with every customer. Ranging from planned decontamination and shutdown procedures to emergency spill response and damage management, we can employ a range of specialised services to fulfil your requirements:

- Hydroblasting
- UHP hydroblasting
- Confined space entry
- Tank and vessel cleaning
- Waste management
- Industrial cleaning
- High Airflow and High Vacuum materials handling

### Partnership approach

To ensure maximum efficiency throughout the life of a project, a partnership between client and service provider must be achieved. Veolia Environmental Services is practised in establishing and maintaining a collaborative approach to its industrial services provision. Working to clearly defined practices and service levels, we can provide the people, the technology, systems and equipment to secure a successful partnership. Together we can help your business manage risk, improve efficiency and reduce costs and waste.

### Health, safety and the environment

Our service delivery is designed to minimise risk to our staff, your staff, the public and the environment. Effective training is critical to our activities, and we make it a priority to ensure our employees adhere to the latest legislation and codes of practice through high standards of education and supervision.

Our services also include evaluation and management of our clients' environmental liabilities through a series of assessment and control systems, maintaining consistent certification and auditing to provide the highest standards of health, safety and environmental practice.

### National network: local service

We work across the UK, from a network of service centres strategically located to supply efficient logistical support and responsive service delivery, to a comprehensive range of industries. To contact us email: [industrial@veolia.co.uk](mailto:industrial@veolia.co.uk)

## reliable, efficient site maintenance services

Veolia Environmental Services combines a range of industrial services to provide appropriate solutions, managing risk, minimising disruption and cost and ensuring legislative and health and safety compliance. We enhance productivity, eliminate waste and add value to the operations and processes of a variety of industrial clients.

### Chemical cleaning

We employ qualified and experienced chemical cleaning teams who can provide tailored solutions to industrial cleaning requirements and deliver the highest levels of service in a safe and efficient manner.

From an initial site survey and discussions to understand customer needs and expectations we identify a range of chemicals to successfully clean heavy contaminants. By running laboratory based trials with our approved suppliers we can provide the most effective methods and a service that delivers visible results through a range of techniques.

### Tank cleaning

Our tank cleaning services are customised to meet our clients' objectives. We work with you to manage your project effectively, carrying out risk assessment and implementing reduction measures, surveying your site and providing technical analysis services to achieve required outcomes safely and efficiently. Services include mechanical, manual and robotic technologies as well as advanced resuspension equipment with hydrocarbon recovery, circulation cleaning and chemical thermal cleaning systems, all carried out with meticulous adherence to confined space entry regulations.

### Materials handling

We operate one of the most versatile materials handling fleets in the UK, significantly improving our waste transfer capabilities on and off site.

Our equipment includes vacuum and high performance liquid ring tankers, high airflow and high vacuumation machinery allowing us to manage anything from dusts and powders to rubble and sludges. Solids and liquids of varying densities and viscosities can be transferred from all kinds of vessels and plant, rapidly, safely and cost effectively, adding real value to your operation.

### Water jetting

Our water jetting services range from conventional manual lancing through to advanced remote, automated and semi-automated systems. We can also provide hydro demolition and cold cutting for hazardous low flashpoint conditions. We lead the industry in best practice solutions, consistently helping to establish more efficient processes, within a safer working environment.

- o Surface cleaning
- o Tube bundle cleaning
- o Concrete removal from bridges or road surfaces
- o Cold cutting pipes, tank plates or pontoons
- o Residue removal

### Environmental response

Even when all possible precautions are taken, unexpected events can result in an emergency situation, requiring a rapid response in order to minimise damage. For clients who need to be prepared for the worst, we operate a national, subscription based Environmental Response service designed to cope with chemical and environmental incidents safely and effectively.

24 hours a day, 365 days a year, our dedicated technical staff and specialised equipment are on standby at strategic points throughout the UK, ready to provide everything from telephone advice to containment and clean up services. We can save you valuable time during a critical situation, minimising environmental impact and financial losses and helping to meet your Duty of Care requirements.
